

The World 2050: Reframing the Climate Debate by Enhancing the Paris Agreement and SDG Linkages

**Minister of National Development Planning/
Head of National Development Planning Agency**

**Presented on UNFCCC/COP 23 Side Event:
The World 2050: Pathways towards a sustainable future
Bonn, 15th November 2017**

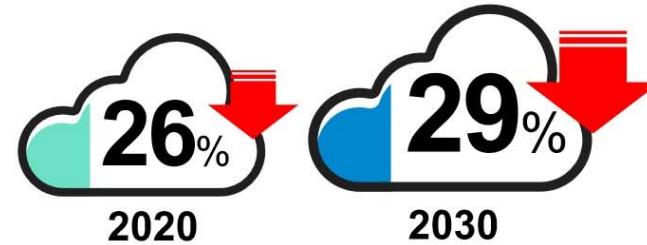

SDGs & Goal 13

Implementation Paris Agreement & SDG's in Indonesia

Maintain the balance between the targets of National Development (economic growth, poverty alleviation, and GHG Emission Reduction)

Mainstreaming climate change action into national development planning and secure the emission reduction target at 26% in 2020 and 29% in 2030

Promote and mainstreaming the green development policy at sectoral and spatial level to RPJMN and RPJMD

Support the target of Indonesia SDGs (Presidential Regulation No.59/2017)

Role of Ministry of National Development Planning In Low Carbon Development

1 Article 3.4 of UNFCCC:

'policies and measures to protect the climate system against human-induced ... should be integrated with national development program...'

2 Presidential Regulation No.61/2011 for RAN-GRK & No.59/2017 for Implementation SDG's

3 Presidential Regulation No. 65/2015 and Presidential Regulation No. 66/2015 for National Development Planning:

**Policy Formulation,
Coordination, Think Tank,
and Development Planning
Administration**

**MAINSTREAMING LOW CARBON DEVELOPMENT INTO
NATIONAL DEVELOPMENT PLANNING**

Indonesia's Commitment on Reducing GHG Emission

Land-based

Agriculture

Energy

Transportation

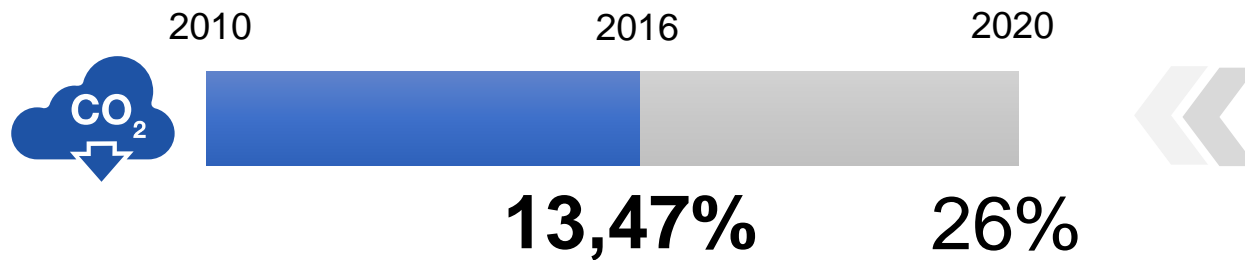

Industry

Waste

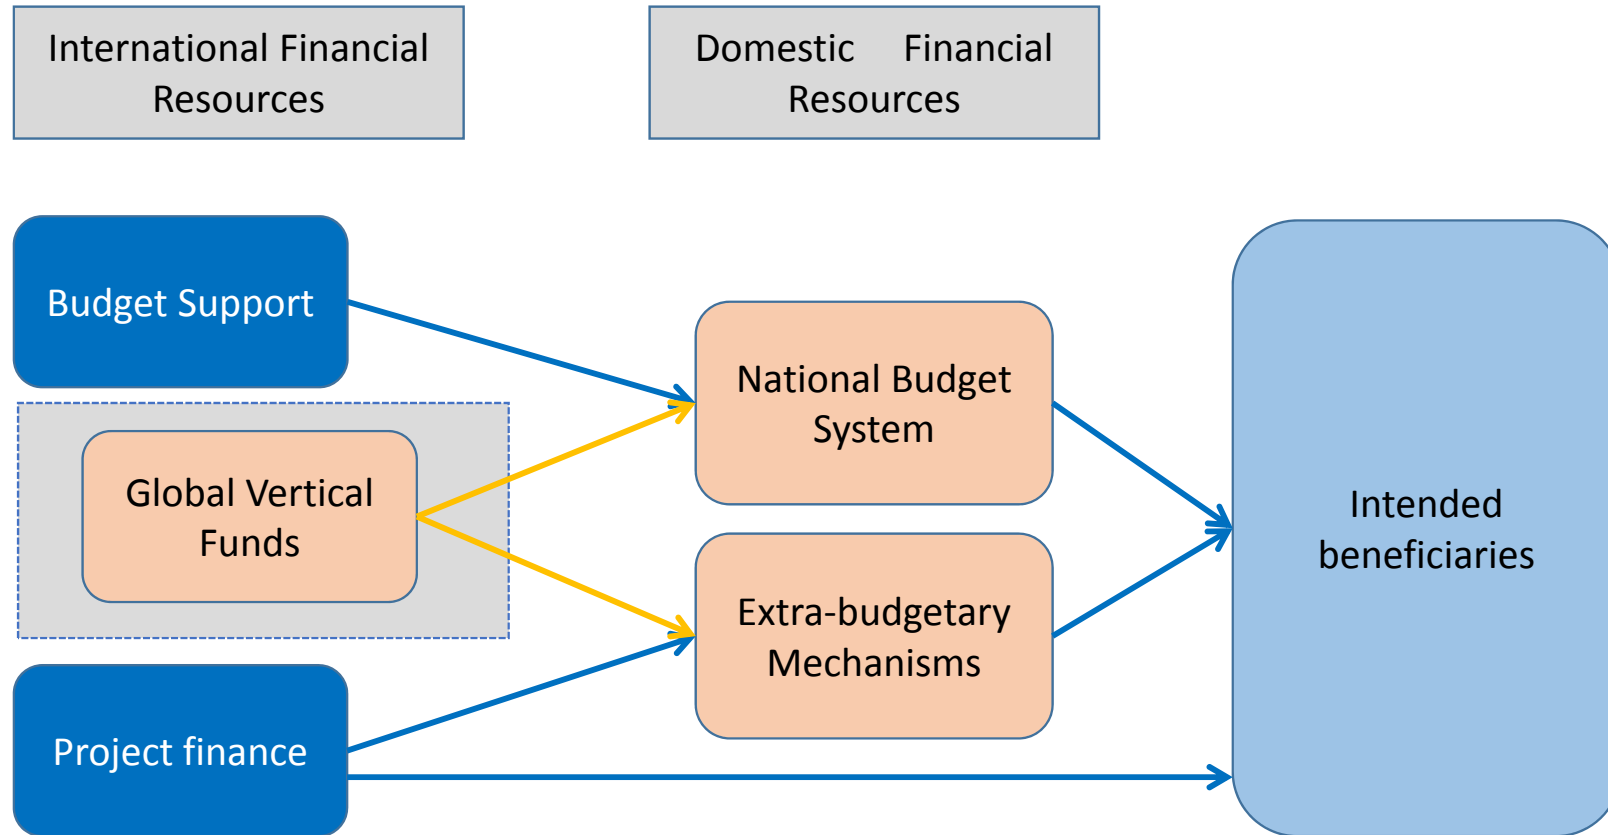

**Presidential Regulation No. 61/2011,
supported by 34 Provincial Governments**

*progress achievement of GHG emission reduction

Involve related ministries, local governments, and other institutions through coordination the implementation and reporting on activity to reduce the GHG emission

Global Partnership

Expected output for The World in 2050 Project in Indonesia

To provide policymakers with information to make better decisions on how to achieve the Sustainable Development Goals

To help identify trade-offs and exploit the synergies of tackling multiple goals simultaneously

To identify the most cost-effective decisions to achieve sustainable development

Thank You
